CAREER SUMMARY

B.Sc. Computer Science student with hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building responsive web applications, implementing JWT-based authentication and authorization, integrating RESTful APIs, and managing cloud-hosted databases. Strong foundation in Data Structures, Algorithms, and problem-solving with a passion for software engineering and continuous learning.

EDUCATION AND CERTIFICATION

Bachelor of Science (B.Sc.) in Computer Science | SIES College of Arts, Science and Commerce 2024-27
Higher Secondary Certificate (HSC) – Science | M.D. College, University of Mumbai 2022-24

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MongoDB Atlas, SQL, PL/SQL

Tools: Git, GitHub, VS Code, Cloudinary, Render, Axios

Core Concepts: Data Structures & Algorithms, Problem Solving, Debugging

WORK EXPERIENCE

React Developer Intern | UptoSkills

March 2025- June 2025

- Developed responsive admin dashboard interfaces using React.js, Tailwind CSS, and JavaScript.
- Built reusable UI components to improve maintainability and user experience.
- Integrated REST APIs and implemented dynamic data rendering for administrative workflows.
- Collaborated on debugging, performance optimization, and frontend feature enhancements.

PROJECTS

K-GPT – AI Chat Application | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, JWT, Axios, Render

- Developed a ChatGPT-inspired web application using React.js, Node.js, Express.js, and MongoDB.
- Implemented JWT-based authentication and authorization for secure user access.
- Built chat history management with CRUD operations and persistent data storage in MongoDB Atlas.
- Designed and deployed a responsive full-stack application on Render with REST API integration.

StayVista – Full Stack Property Listing Platform | [GitHub](#) | [Live Demo](#)

- Developed a full-stack property listing platform using Node.js, Express.js, MongoDB, and EJS.
- Implemented CRUD operations and MVC architecture for efficient application management.
- Integrated authentication, authorization, and role-based access control for secure user access.
- Utilized Cloudinary and MongoDB Atlas for cloud-based image and data storage.
